AMENDMENT

Sir:

Kindly substitute the paper copy and computer readable form of the Sequence Listing originally filed in this application with the attached paper copy and computer readable form. This amendment is being filed following a status inquiry on the PAIR system indicating a technical flaw in the computer readable form of the sequence listing previously filed in the application and following a telephone inquiry with India Evans regarding the same.

Applicants have requested, but to date, have not received notification of the errors in the computer readable form or a Form 905. However, this substitute paper copy and computer readable form are believed to be in compliance with the rules, and are being hand-delivered to avoid corruption during mail processing.

A separate paper in compliance with the requirements of 37 CFR §§1.825(a) and (b) is being supplied herewith.

The Director of the US Patent and Trademark Office is authorized to charge any deficiency in the fee associated with the filing of this paper to deposit account 08-3040.

Respectfully submitted,

HOWSON AND HOWSON
Attorneys for the Applicants
